

fulgur-chart sample gallery

A gallery of static SVGs produced by fulgur-chart, covering every supported chart type and the main features. Rendering through `fulgur render` embeds the SVGs into a PDF as vectors.

Bar

Vertical bars: monthly revenue.

Horizontal bar

Horizontal bars via `indexAxis: "y"`.

Stacked bar

Series stacked via `scales.y.stacked`.

Line

Two series, smoothed with tension.

Area

Line with "fill": true.

Pie

Auto-colored per slice.

Doughnut

Doughnut with a right-aligned legend.

Scatter

$\{x, y\}$ points on linear axes.

Bubble

$\{x, y, r\}$ — radius as a third dimension.

Radar

Multivariate comparison in polar coordinates.

Mixed

Per-dataset type: bar + line.

Matrix (heatmap)

Each cell is a $\{x, y, v\}$ point; color interpolates white $\rightarrow$ backgroundColor.

Data labels

Values drawn per point via `plugins.datalabels`.

Theme (dark)

Colors overridden via `options.theme`.

Vega-Lite — bar

Grouped bar from a Vega-Lite spec. Tableau10 palette, white background.

Vega-Lite — line

mark: "line" with color encoding for multi-series.

Vega-Lite — scatter

mark: "point" — quantitative x/y axes, color by nominal field.

Vega-Lite — arc

mark: "arc" with theta encoding — renders as pie.
